How to play the MAP GAME:

1. **w** tells you which direction is NORTH, EAST, SOUTH, WEST. Knowing this helps you to find places and to explain where something is located. You can find this symbol on the lower bottom left corner of your map.

Example: I live EAST of the school.

2. The street or path you travel on from one place to another is called a **ROUTE**.

3. The letters on the top and bottom and the numbers on the left and right of the map are called **COORDINATES**. When you find a place on the map you can use the coordinates to tell people where it is. If you look on the top (North) or bottom (South) to see which letter is nearest to the place and then look to the left (West) or right (East) to see which number is the closest to the place and also name the street you can tell people where it is.

Example: My house is at E3 on Bopf Street.

4. On the right side of the map is your school's name, the safest routes to school, where the walking school bus starts, and circles to show you how far your school is away from different places. This area is called the **LEGEND**.

START HERE

Find where your home is located (if it is not on the map, find the street that is closest to your home). Write below where your home is located using the coordinates and street name.

Name a street that goes North and South.

How long would it take for you to walk to school from home?

How long would it take for you to bike to school from home?

Draw a line on the map to show which streets you use to get home from school.

Find your school on the map. Write below where it is located by using the coordinates and street name.

Fun Tips For Walking & Biking In Your Neighborhood

Walking and biking is the most fun when we do it with family and friends!

Before crossing a street, look **Left, Right, Left** again and all around. Listen for cars buses, trucks and bikes. Be ready to stop if you see or hear anything.

Talk with an adult in your family to find out which streets are okay for you to walk, bike, scooter, or skate on safely.

Always choose the route with fewer crossings and less busy streets.

Wear a helmet when you bike, scooter, skateboard, or rollerblade. Make sure it fits right.

Have Fun!!

Find and draw pictures for 3 other places on the map where you like to go (parks, friend's house). Are these places North, East, South or West of where you live?

CONGRATULATIONS! You know how to use a map!
